

AI Engineer

About Us

WOGOM is a B2B Commerce and Retail Enablement Platform, empowering 6,000+ retailers and 450+ sellers across India with better Products, Pricing, Credit, and Growth Opportunities. Our goal is to build a connected ecosystem where technology, capital, and commerce converge to help Indian retailers scale with confidence.

Role Overview

The AI Engineer will play a crucial role in developing and deploying AI models that drive real business impact, leveraging machine learning and deep learning fundamentals to solve complex problems. This role will have a direct impact on WOGOM's mission by enabling Indian retailers to scale with confidence through technology, pricing, credit, and growth opportunities. The ideal candidate will bring a unique blend of technical expertise, business acumen, and collaboration skills to drive real-world AI implementation.

Key Responsibilities

- Design, develop, and deploy AI/ML models to drive business impact, working closely with cross-functional teams to integrate models into production systems.

- Collaborate with teams to understand requirements and deploy AI models, ensuring seamless integration and minimal disruption.

- Monitor and improve model performance, analyzing data to optimize results and drive continuous learning.

- Document workflows, models, and technical decisions to share knowledge and ensure transparency.

- Train and optimize models using structured and unstructured data, developing data processing pipelines to support model development.

- Integrate AI models into production systems and internal tools, ensuring successful deployment and collaboration with engineering and product teams.

Requirements

Must-Have Skills

- Strong machine learning and deep learning fundamentals, with proficiency in Python programming and experience in model deployment and real-world AI implementation.

- Ability to work with structured and unstructured data, with a strong understanding of AI model development and deployment.

- Proficiency in developing and implementing Python-based solutions to support AI model development and deployment.

- Experience with data processing and analysis pipelines to support model development and optimization.

Nice-to-Have Skills

- Experience with TensorFlow or PyTorch, with knowledge of SQL and data analysis to optimize model performance.

- Familiarity with APIs and backend integration to integrate AI models into production systems.

- Strong understanding of data analysis pipelines to support model development and optimization.

Who Will Succeed in This Role

The ideal candidate will be a detail-oriented, strategic thinker who is passionate about AI and machine learning, with excellent communication and problem-solving skills. They will be a team player who can effectively communicate technical concepts to both technical and non-technical stakeholders, and thrive in a fast-paced environment with a focus on continuous learning and improvement.
