

AI Engineer

About Us

WOGOM is a B2B Commerce and Retail Enablement Platform, empowering 6,000+ retailers and 450+ sellers across India with better Products, Pricing, Credit, and Growth Opportunities. Our goal is to build a connected ecosystem where technology, capital, and commerce converge to help Indian retailers scale with confidence.

Role Overview

The AI Engineer will design, develop, and deploy AI/ML models to drive business growth. They will work closely with cross-functional teams to integrate AI models into production systems. This role will have a direct impact on WOGOM's mission to empower Indian retailers through technology.

Key Responsibilities

- Design, develop, and deploy AI/ML models for real business use cases
- Work with structured and unstructured data to train and optimize models
- Integrate AI models into production systems and internal tools
- Collaborate with product, engineering, and business teams to understand requirements
- Monitor model performance and improve accuracy over time
- Document workflows, models, and technical decisions

Requirements

Must-Have Skills

- Strong Machine Learning and Deep Learning fundamentals to design effective AI models
- Python programming skills to implement and deploy AI models
- Model deployment and real-world AI implementation experience to integrate AI models into production systems
- Excellent communication and documentation skills to collaborate with cross-functional teams

Nice-to-Have Skills

- Experience with TensorFlow or PyTorch
- SQL and Data Analysis skills
- APIs and backend integration experience

Who Will Succeed in This Role

The ideal candidate is a detail-oriented, analytical, and strategic thinker with excellent problem-solving skills. They are a team player who thrives in a fast-paced environment and is committed to delivering high-quality results. They are also a continuous learner, always looking to improve their skills and stay up-to-date with the latest AI trends and technologies.
