

AI Engineer

Location: Ahmedabad, India

Type: Full-time

Department: Engineering

About Us

WOGOM is a B2B Commerce and Retail Enablement Platform, empowering 6,000+ retailers and 450+ sellers across India with better Products, Pricing, Credit, and Growth Opportunities. Our goal is to build a connected ecosystem where technology, capital, and commerce converge to help Indian retailers scale with confidence.

Role Overview

The AI Engineer will design, develop, and deploy AI/ML models to drive business value. This role will have a direct impact on WOGOM's mission by empowering Indian retailers through technology. The ideal candidate will be a highly skilled AI Engineer with a strong passion for AI and Machine Learning.

Key Responsibilities

- Designing, developing, and deploying AI/ML models for real business use cases
- Collaborating with product, engineering, and business teams to understand requirements
- Integrating AI models into production systems and internal tools
- Monitoring model performance and improving accuracy over time
- Working with structured and unstructured data to train and optimize models
- Documenting workflows, models, and technical decisions

Requirements

Must-Have Skills

- Strong understanding of Machine Learning and Deep Learning fundamentals to develop and deploy accurate models
- Proficiency in Python programming to implement and deploy models
- Experience with model deployment and real-world AI implementation to integrate models into production systems
- Strong collaboration and communication skills to work with cross-functional teams

Nice-to-Have Skills

- Experience with TensorFlow and PyTorch
- SQL and Data Analysis skills
- APIs and backend integration experience

Who Will Succeed in This Role

The ideal candidate is analytical, detail-oriented, and a strategic thinker, with excellent problem-solving skills and a passion for AI and Machine Learning. They should be able to collaborate and communicate effectively with cross-functional teams and thrive in a fast-paced and dynamic environment. A strong background in AI/ML/Data Science and a commitment to continuous learning and growth are essential for success in this role.

Experience: Approximately 1–3
